

Peer Review of Aaron Chen

Category	Score	Comments
Quality of Work	3 (Full Marks)	Very well organized in terms of ease of access and understandability! I do appreciate the project outline document that you included, good to see exactly what you were hoping to accomplish!
Intellectual Merit	3 (Full Marks)	This seems to be a good use of college knowledge, and the student appears invested and interested in seeing this through. This is clearly seen through their code work and use of coding languages
Video	3 (Full Marks)	Very informative, and shows the code working through website, and explains clearly how each line affects the output of program.
